Course was very enlightening and insightful. Grading system was very fair as it represented the taught material very well. ~~that~~ suggestion: to prevent grade inflation of a class - it is not necessary to curve a 10 question quiz that had no surprises and was shorter than the homework - in addition ample extra credit is provided.

Overall he is a good professor  
but strict on grading also  
he needs to calm down on the  
topic b/c for some student - like  
1<sup>st</sup> time to this subject is really  
hard to understand the concept  
And needs to be easy on H.W  
grading.
