This professor has been one of the best I have ever encountered, he has single-handedly changed my ways of living. Even after a long private school education into college, my only semester in public school has been highlighted by the ~~knows~~ education I've earned in this class. I have recommended to all of my friends to enroll in the summer between years of college because of the personal gratification I've recieved in the class.

Thank you for teaching me.

This class is really interesting.

Even though it's hard to understand, you did try to make it easier for me to understand.

Also, since this is an intro class, please try to be a lenient grader.

Philosophy is hard to understand and write about too.

Always for writing papers, I don't like it when you have it in words. Maybe you should base it on pages instead. Otherwise, thanks again.

This course was really great. Even though I am probably going to fail, I absolutely loved this class. At times I would come in without sleeping for over 24 hours and somehow managed to become really interested.
You rock!

Although this class is a hard class, Prof. Morrow has done his best to explain all the ideas & theories & to make sure the students understand them. I would like to take another philosophy class with him.

He used a lot of examples to clarify the topics. Also very funny and engaging. I have absolutely nothing bad to say about him. Excellent professor.

Excellent teacher, did an amazing job unpacking very difficult ideas of standardly ~~to~~ abstract and "heavy-hitting" philosophers like Locke and Kant. Very approachable, very patient, yet challenged students to really examine ethics and how we ought to approach it. Will highly recommend him to others.

great professor, one of
the very few at hunter
who actually know what
they are talking about.
Knowledge of course material
is quite extensive.

I loved this class. It really sparked my interest in Philosophy. You should also teach upper level courses.

Just one suggestion, I feel the #30 was not necessary. I found

alot of the readings online for free

So yea that's all. Besides that

you're great. Very intellectual

and pleasing to the eyes. (17)

LOL / JP.

He made the course very interesting
giving examples that let me understand
the material better

He's friendly good brings in a good atmosphere
to the classroom. He makes things sound interesting
and give examples we can relate to.
Definitely a good teacher.
